## Hanging Displays made of aluminium tubes/profiles

A variety of aluminium profiles can be curved according to your requirements. They can be used as ceiling installations at trade fairs, exhibitions and events or as interior decoration in shopping centres, lobbies or other public spaces.

All hanging displays are applicable for wire-cable suspension.

Examples	Base	Height system	suitable profiles
Circle, Ellipse 		min. 100 cm max. 240 cm	Aluminium profile, anodised Ø 30 mm Aluminium profile, anodised 17 x 44 mm Q-Frame® profile 50

## Hanging Displays Q-Frame®

These high-grade profiles take your message to the next level. The Q-Frame® profiles 1 x 45°/2 x 45° will be used for large-scale rectangular and cubic displays. Q-Frame® profiles 50 can furthermore be curved into the shape you desire and also be used with double-sided textile prints. The attachment via keder ensures that the prints are always perfectly stretched. The keder sewn along the edges of the print enables you to replace graphics at any time.

### Rack

Q-Frame®-profiles

### Material advertising print

- Multisol® D (205 g/m²)
- Multisol® X (200 g/m²)

## Hanging Displays Economy

### Cylinder Economy

The Cylinder Economy enables you to go bigger at your next exhibition without spending a fortune. The system features a lightweight cylinder consisting of shape giving fiberglass rods which hold the advertising print into place. Cylinder Economy is the best possible solution if you are searching for a simple and light-weight, but large-scale hanging display with an excellent price-performance ratio.

### Circle Display

Circle Displays get noticed even from afar because of their remarkable shape. They offer a characteristic solution in size XXL to present your advertisement. When choosing the double-sided finish, you obtain 8 printable surfaces. So you can benefit from up to 8 different graphics to promote your products and services. With a total diameter of 300cm, Circle Display offers up to 14m² of space for your messages.
