# Welcome to Sachsen Fahnen

Dear customers

Sachsen Fahnen is today one of the biggest screen and digital printers in Europe. The company boasts over 30,000 m<sup>2</sup> of production space within one of the world's largest and most advanced printing works where fabrics, metals, PVC, board and glass are refined and subject to further processing. The logistics centre, covering an area of 6,000 m<sup>2</sup> and with 7,000 pallet spaces, is where deliveries of national or international orders are coordinated and monitored.

The entire organisation, encompassing all sequences and processes from production to the finished product, takes place under one roof. Taking the needs of our customers as the basis, all elements are subject to an ongoing process of optimisation. Work throughout the entire production process is performed in compliance with stringent quality and environmental standards. References from a full range of sources reflect the exceptional quality of our production. Sachsen Fahnen is a member of the Flag Alliance®, a union of leading international companies in the textile printing sector. Under the

motto "Global Competence – Local Presence", 500 employees over four continents (300 in Germany itself) are dedicated to serving our customers.

Meanwhile, patents reflect the high creativity and skills of our employees and the immense potential harboured in the Flag Alliance®. We team up with national research institutions and universities to initiate and implement research projects.

The current catalogue includes comprehensive information about our products and the technical options we open you up. We have the right solution for any task. What can we do for you?

Jürgen Ruhland  
Managing Director

vispronet®

Vispronet® is the online shop of Sachsen Fahnen and further members of the Flag Alliance®. This brand is synonymous with almost a quarter-century of experience accumulated by Sachsen Fahnen.

Vispronet® showcases ideas, provides solutions and hits the right note with its comprehensive service, including overnight delivery. We provide products and services for corporate and private customers, associations, sport clubs and schools etc.:

- Advertising and decoration for interiors and exteriors
- Dialogue at the point of sale
- Trade fair and shop fittings
- Event design and gift ideas

Screen printing

Screen printing

## Everything under one roof

Each year, Sachsen Fahnen and the members of the Flag Alliance® produce up to eight million square metres in screen printing and two million square metres of digitally printed materials and boards. We use the latest methods and a wide range of printing technologies to ensure customer orders are swiftly implemented with no compromise on quality. From individual items to large-scale batches – trust us to source the right solution, whatever your task.

The key element underpinning the printing process is the set of customer files. Whatever the product, when it comes to creating print data, our webshop is guaranteed to have suitable layout templates available as required. Printing data can be transferred via uploading, by post or by e-mail.

Alternatively, there is also scope for the customer to go online and personally take over the task of designing flags, advertising banners, Bowflag® and a wealth of other products, even for those with no graphic design experience, via Visprodesign®, the free-of-charge design tool from Vispronet®.

Screen printing includes scope to create print formats of up to 220 x 630 cm. Moreover, the printing machines can accommodate printing with up to 12 screens. Designs are printed in high-resolution with up to 22 dots/cm on a wide range of materials. To optimally exploit the brilliance and brightness of the colours, the flag fabric is thermally fixed after printing. Subsequent washing serves to eliminate non-fixed excess dye, helping to refine, dry and round off the final aspects of the flag fabric. This also helps to ensure the products are immediately available for use upon reaching the customer.

Print dye production

Direct laser engraving (DLE technology)

Pre-treatment and finishing line

Digital printing allows swift and cost-effective printing not only of flags, indoor banners and Bowflag®, but also of posters and advertising signs, from as little as a single piece. Digital printing is the best print method for multi-coloured motifs and colour gradients, even for individual pieces.

Printing resolution is between 360 and 1080 dpi with dispersion or sublimation inks. For products used outdoors, e.g. flags, banners and Bowflag®, water-based dispersion inks are used.

The advantages of these inks are plain to see:

- Excellent print through, for unbeatable visibility of the advertising message, including on the rear side
- Great lightfastness, comparable to the performance in screen printing (textiles)
- Strong contrasts for exceptional reproduction of graphics
- Darker colours displayed with unparalleled quality

Post-printing, all products are fixed, washed, refined and dried, in keeping with our stringent quality standards. We finish your products according to your requirements. Depending on the volume, we use our fully automated finishing line.

Washing/drying unit

Fully automated finishing

Manual finishing

Digital printing (PVC, textiles)

Metal tubing of banners

Plotter

Digital printing can be used for a range of rigid and flexible materials (e.g. PVC, board or films) as well as for fabrics. When printing large-format banners on PVC or mesh, we can deploy special printers that handle print widths of up to five metres.

You want to go bigger? No problem! Individually printed panels can be joined with high-frequency welding technology, paving the way for practically any format.

Make sure your advertising design stands out. We implement outlined cuts and bend aluminium profiles into the shape you want.

At our 6,000 m<sup>2</sup> logistics centre, we coordinate the punctual worldwide delivery of all our orders. Plain packaging and shipping, shipping to a different delivery address or in accordance with distribution plans, and special packaging – they are all possible. The large storage capacity helps ensure rapid availability of all system components.

Digital printing (Board)

Finishing of PVC and textiles

Standard or express shipping – at Vispronet®, you yourself decide how fast you want the product to arrive. We can even arrange it overnight on request. Set things up and order by 9.00am via Vispronet®, and the ready-to-use product will arrive the very next working day!

All sequences and production processes are regularly certified by TÜV SÜD (German Technical Control Board). Our textile products are inspected in accordance with the Oeko-Tex® Standard 100 and labelled to confirm their status as „trusted textiles“. Vispronet® is certified with the Trusted Shops® seal of approval.

Whether your advertising is for interior or outdoor use, and for the short or long term, we have the right solution for you – on time, reliably and with unbeatable quality!

# Flags

Flags by Sachsen Fahnen/Vispronet® boast quality and durability, lending them matchless appeal. Each flag is washed and finished before delivery. This approach means they reach you ready for immediate use and stay colourfast and brilliant over the long term. From economic to premium options, we supply flag fabrics of various quality grades for a wide range of applications:

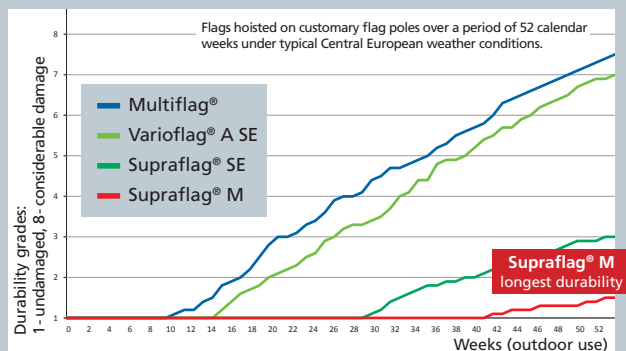

- Multiflag® SE: the cost-efficient all-round flag fabric
- Varioflag® A SE: the breathable fabric with a perforated structure
- Supraflag® SE: guarantees exceptional tear strength and durability for flags
- Supraflag® M: premium quality for screen-printed flags, which last up to 100% longer than comparable flags made with conventional materials, plus unbeatable lightfastness (Grade 6-7 on the Blue Wool Scale)

The durability diagram shows the results of the wear test conducted on four different flag fabrics.

The test clarified the following:  
Flags made of **Supraflag® M** last up to 100% longer than flags made of conventional fabrics.

Double-sided flags with varying design on the front and rear sides

## Flags

Flags can be seen for miles. Whether in portrait or landscape style, flags for poles with banner arms, banner flags or flags with customised outlines – whatever your need, we have the fit for it!

Screen- or digital-printed flags can be supplied in numerous sizes and finishing options.

- Double-sided flags mean two advertising surfaces available, with either matching or contrasting designs on the front and rear sides
- Flag Presenters keep flags completely unfolded, even without the lightest wind (for more information, see p. 43)
- A comprehensive range of flagpoles is also available

## National Flags, Representative Flags

National flags have symbolic importance and give international flair to conferences, symposia and sporting or corporate events.

National flags of more than 200 countries and other special flags are available from stock (overview at the end of the catalogue on p. 64). We can deliver those flags in standard sizes on short notice.

Representative flags in various configurations are also available for indoor use. To round things off and for presentations, you can also rely on us for high-quality indoor pole stands and flagpoles.

- National flags, banner flags, representative flags, car flags or small flags and much more
- Black ribbon available in various lengths as an accessory

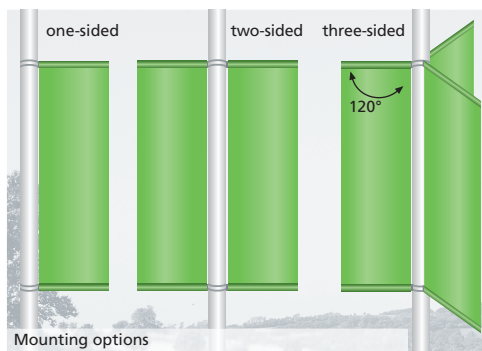

## Street Banners

Street Banners are ideal for event advertising, promoting tourist attractions or corporate advertising in town and village centres.

The rust-free and stable system can be fixed to all pylons and lampposts (Ø 60 - 250mm) or walls. The print can be replaced at any time.

**Street Banner Basic** offer reliable and effective advertising at a reasonable price.

The system is usable with free waving or stretched banners.

The graphics get printed on flag fabrics with outstanding print through qualities. As an alternative, printing on both sides is possible using an opaque PVC material for the banner. Exchanging the print is easy.

- Excellent price-performance ratio
- Durable system parts made of aluminium and stainless steel
- Also designed for wall mounting

**Street Banner Select** are specialists when it comes to advertising on poles and lampposts exposed to strong winds. The top-quality systems will win anyone over, with specially developed holders made of robust materials.

- Top-quality and exceptionally stable system for use when exposed to above-average stresses
- Break-proof system parts made of stainless steel, aluminium and glass fibre
- Enhanced safety thanks to an additional locking pin with retaining ring

### Car Flags

We've all seen them – Car flags. Part of the urban landscape during major sporting events and occasions. Car flags printed with names or individual graphics are popular ways of decorating vehicles during weddings and family celebrations.

- Delivery including flag holder
- As national flag or with advertising print
- Quick to setup

Size	Length of flag holder in cm	Flag size W x H in cm
M	43	40 x 28
S	30	30 x 20

### Small Flags

Small flags are popular ways to convey advertising and other messages to the public. Their eye-catching appeal make them popular fan and marketing items during city festivals, sporting and cultural events. Small flags are ready-to-use and last a long time, even when used frequently.

- With sleeve or cord
- Wooden dowels available with or without yellow top
- Various wall mountings available

### Ice Cream Flags

Ice cream flags spread your messages at kiosks, retail outlets, walls and in foyers. They are made to promote services and products of small businesses at a reasonable price-performance ratio. Ice cream flags are available with weatherproof banners made of vinyl, printable on both sides or with flags made of fabric. The flags are supplied complete with flagpoles.

- Made of durable vinyl banners or with flags made of fabric
- Flagpole tops in a range of colours and shapes
- Wall bracket 60° or 75°

Size W x H in cm	Angular bottom edge	Straight bottom edge
Flag bracket 60°	46 x 46	46 x 30/57 46 x 37/64
Flag bracket 75°	46 x 46	46 x 35/47 46 x 52/64

## Suction Holders

Use glass front panes or other flat interior surfaces to attach advertising messages!

Small flags with suction holders stay in place easily via vacuum attachment but are also just as easy to remove – ideal for retail campaigns, signposts or advertising during events.

The fixing system can also be used in confined spaces even without a pole. A printed display film with punched holes can be attached directly to windows or doors using the suction cups.

- Also available as advertising banners with four suction cups
- Portable advertising or signage, can be used on plain surfaces, mounted within seconds
- No gluing, screwing or drilling required
- Suction cups can be removed completely without leaving any residues

## Buntings

Buntings are popular decorative and event-advertising media during sporting events, street festivals or company anniversaries. There are many ways to deploy them: through coloured pennants, national flags or with customised graphics. In addition to the classic triangle or rectangle forms, we manufacture buntings also in special shapes.

- Available in a range of different lengths and sizes
- Usable indoors or outside
- Scope to include individual shapes

## Boat Pennants

Boat Pennants with customised graphics, lettering, club emblems or in national colours are classic choices for sailing or water sports.

Boat Pennants with a sleeve can be rounded off with matching wooden dowels and wall mountings.

- Two options possible: with sleeve or cord
- Immediately ready for use, no pre-washing required
- Can be used as handwaving flag when combined with a pole

Size W x H in cm
40 x 25
30 x 20

### Fan Banners

Express your enthusiasm with our fan banners in size XXL. These huge and durable stadium banners help fuel an unmatched atmosphere at any sporting occasion. Present your club logo, lettering or advertising messages with unrivalled prominence, either high above fans' heads or centrally placed on the pitch. Fan banners turn any sporting occasion into an unforgettable event.

Your graphics will be printed on the most durable flag fabrics. You can choose from a range of shapes and executions based on your requirements: cut or with reinforced edges, with eyelets or loops.

- Various shapes: square, rectangular, round or as a t-shirt
- In standard dimensions and individual sizes
- Accessories for fixing available

#### Fan Banners: Shapes

square

rectangular

round

t-shirt

### Representative Flags

Representative and elegant – individually printed club flags are an appealing and economic alternative to embroidered flags. Choose between: double- or single-sided, elegant with fringes or simple borders, as club flags or ceremonial flags. Representative Flags are a top-grade way of presenting national and federal state flags within indoor spaces.

- Exceptional price-performance ratio
- Accessories: indoor pole stands, flagpoles and ornaments
- Fringes and loops in various colours available

## Banners

Banners spread your message on fences, guard rails or bridges, over roads and paths - and within interiors.

The use of tried-and-tested flag fabrics and tear-proof seams give banners exceptional durability.

Along with various standard sizes, the dimensions can also be fully customised to meet your requirements. Choose from a range of fabrics, formats and options for finishing.

Banners can be equipped with classic eyelets or reusable Grip Clips.

- Easily attachable
- Colourfast and lightfast
- Versatile usability indoors or outside

### Banners made of Varioflag® A SE

Capitalise on the advantages of Varioflag® A SE!

The perforated structure of banners made of this unique mesh polyester material renders them highly breathable, elastic and thus exceptionally hardwearing – ideal for outdoor use.

- Breathable, elastic and extremely durable
- No hemming required
- Also available on roll with continuous printing

## Banners made of Indekor

Banners made of non-woven polyester represent a reasonably priced alternative for use in short-term campaign and perimeter advertising. Despite its low grammage, Indekor is exceptionally stable, with outstanding tear and abrasion resistance, whether conditions are wet or dry. This non-woven polyester can be printed continuously, while the desired final dimensions are simply to cut from the roll with scissors to the required length at the site of use. Banners made of Indekor can be supplied with flame-resistant finish.

- Weatherproof
- Tear- and abrasion-resistant
- Fixable using nails, glues, staples or cable ties

## Grip Clips

Grip Clips make attaching and tautening banners as easy as possible. The banner is placed and clamped between the upper and lower parts of the clip. Grip Clips are the quick and easy alternative to classic eyelets. The need for additional tools or perforation of the material is eliminated. Grip Clips are easy to remove and reuse. The special locking mechanism allows the practical eyelets to develop considerable clamping force.

- Highly effective, even when exposed to high tensile loads
- Material-friendly, replaceable and flexible
- Can be removed without residues

	Grip Clip Mini	Grip Clip Midi
Material	Glass-fibre reinforced nylon	
Ø eyelet	9mm	10mm
Tensile strength	up to 45kg	up to 100kg
Suitable for material thickness	up to 1.5mm	up to 5mm
Colours		

## Indoor Banners

Indoor banners are the perfect way for you to showcase brands and messages simply and elegantly. They can be used as partitions, point-of-sale advertising or interior decoration.

All designs, from simple solid-colour graphics to most demanding screen graphics, are created and made pin-sharp, with brilliant rendering of colour. High-resolution printing guarantees outstanding results.

Select from a wide range of fabrics covering the whole spectrum from transparent to opaque, and also available in flame-retardant versions.

- Even the most challenging of graphics can be screen-printed at high resolutions
- Versatile range of materials for different kinds of use
- Various mounting options – from price-conscious to premium!

## Twiny®

Double your advertising effect on textile banners. Twiny® technology allows for positive prints of the same or different images on the front and rear side of textile advertising media.

- Double your space for printing on textile banners
- Same or different graphics on the front and back
- Usable within interior spaces, short-term outdoor use

## Hanging Options

**Metal tubing**, modern and visually appealing, is available in sizes of Ø 10mm and Ø 13mm.

- Available in four colours: black, white, gold and silver
- Metal tubes Ø 13mm with end caps in matching colours

Plastic clamping rails are a cost-effective and flexible way of attachment for small and medium-sized textile banners.

- Available in five colours: black, white, gold, silver and transparent
- Including mounting eyelets and nylon thread
- Print replaceable

**Aluminium profiles Ø 16mm** help you showcase fabric banners in a classy and elegant manner.

- Suitable for large formats
- Slip-proof
- Print replaceable
- Including mounting eyelets, end caps and nylon thread

**Sewn-in and glued-in metal sticks** are the most discreet way of applying weighting to and installing textile banners.

- Suitable for small- and medium-sized formats
- Graphics fully visible
- Including hanging clips and nylon thread

**Aluminium clamping rails** to further enhance the visual appeal of fabric banners.

- For textile banners large or small in size
- Rails with slip-proof device of sponge rubber
- Including mounting eyelets, nylon thread and end caps
- Print replaceable

**Wooden dowels** are a stable alternative for use in hanging textile banners with sleeves.

- Suitable for medium- and large-sized formats
- Wooden dowels available in various diameters
- Suspension: cord gets stapled to the wooden dowels

# Bowflag®

## Bowflag® Basic

Bowflag® Basic is the solid, proven option from the Bowflag® range and boasts an outstanding price-performance ratio. The lightweight system is swift and easy to put together in just a few steps. Bowflag® Basic is the perfect choice for cost-effective advertising at events, at the point of sale and during exhibitions. With a firm anchor, single-sided Bowflag® Basic can be used in conditions up to wind force 6 (almost 50 km/h). When using double-sided material, we recommend use in conditions up to wind force 4 (28 km/h). A comprehensive selection of bases rounds off the Bowflag® range.

- 5 shapes
- Various sizes
- Lightfast prints with excellent print through

## Bowflag® Specials

Deploying a **Floating Base**, enables you to use Bowflag® Basic and Select also on lakes. The Floating Base gains the stability required thanks to a weight on its lower portion.

- Available in two versions
- Usable with Bowflag® Basic and Bowflag® Select
- Great flexibility through swivel with or without spring
- Supplementary set available to retrofit water filling base P3 as floating base

NEW

**Bowflag® T** is among the „biggest“ in the category of small advertising media. They can be found at trade fairs, counters and reception desks. The chrome-plated pedestal helps the whole structure remain firmly in place. Bowflag® T are available in single- or double-sided designs. The double-sided version allows identical or contrasting graphics to be shown on the front and rear side.

- Striking drop shape
- Single- or double-sided
- Total height: 55 cm

**Bowflag® Basic** can be installed on Pop Up Tent Select and Gazebo Select and effectively boost your advertising message in the process.

With customised graphics or in 20 stock colours, they will certainly grab the attention of all customers and passers-by.

- For Bowflag® Basic XXS up to S
- Brackets at two different tilt angles available, made of glass-fibre reinforced, extra-strong plastic
- Attachment does not require additional tools

Using the **Wall-Mount 30°**, Bowflag® Basic can be easily and safely attached to walls and facades within the range from XXS to M sizes. The stable bracket of powder-coated steel is designed for use either indoors or out. Once mounted, the weatherproof system can be reused again and again.

- For walls and facades
- Bracket made of powder-coated steel
- Easy to assemble
- Inserted Bowflag® can be exchanged at any time

The **Flagpole Economy** conveys advertising messages via the classic flag medium – the rectangular alternative to promotional sails. Popular for good reason, thanks to its mobility, efficiency and amazing price-performance ratio. The practical aluminium plug-in system can be put together in just a few easy steps.

- A rectangular alternative to the classic Bowflag®
- A simple aluminium plug-in system with spring buttons
- Various standard heights

The **Promotional Backpack Bowflag®** conveys information wherever your target group may walk. No matter how big the crowd, they draw attention to your messages.

Promotional Backpacks are available in various Bowflag® shapes: drop shape or other flying shapes. For more information, see p. 33.

- Ergonomically shaped
- Practical side pockets for bottles, brochures etc.
- Additional designs: flag or display

# Display Systems

## Roll Up Select

When it comes to getting the message across in a flash in a range of locations, leave it to Roll Up. The systems can be set up and dismantled within seconds – pull the advertising print out of its case, hang it up – done!

The elegant case made of aluminium and the transport case included in delivery protect the graphics during storage and transport.

Roll Up has established its reputation by offering top-class material quality alongside outstanding functionality.

Various Roll Ups are available depending on your intended use.

- Roll Up Select**
- Freely adjustable height
  - Graphics can be changed easily and quickly via a clamping rail attachment mechanism

### Pop Out Banner

Super-lightweight, installable in no time and impossible to ignore – Pop Out Banners are ideal for interior use or short-term campaign advertising outdoors. For mobile advertising boards and pitch perimeter advertising at sporting events, presentation areas for sponsors, at trade fairs

or for promotional purposes at the point of sale – superb versatility across the board.

- Unfolds with a flick of the wrist
- Extra lightweight and small, folds flat thanks to flexible GRP rods
- The base also serves as a transport bag

## Display Wall

### Display Wall Basic

Display Wall Basic is the perfect display option for economical, large-scale advertising indoors or out. Assembly couldn't be easier. No additional tools are required. The system is built of lightweight aluminium profiles and secured in place using stable base plates. The print is available as a single- or double-sided version and can be pulled simply over the system.

- Cost-effective display for portable presentations
- Quick to assemble thanks to the flexible slot-in system
- Double-sided option: identical or contrasting graphics at the front and rear sides are possible

Display Wall Basic	System height in cm	Height print in cm		Width print in cm
		single-sided	double-sided	
245 cm	245	190	200	300, 232
215 cm	215	140	150	300, 232
177 cm	177	140	150	300, 232

### Display Wall Q-Frame®

Display Wall Q-Frame® paves the way for top-quality presentation and is tensioned in a single- or double-sided arrangement. This modern tension frame system can be used as a freestanding display in portrait or landscape style. The prints come in custom sizes and are finished with keder. Inserting the keder into the slot of the frame keeps the fabric tensioned crease-free and easy to replace at any time. Opaque and transparent materials can be combined for fascinating 3D effects. A range of base options can be used to round off Display Wall Q-Frame®.

- For premium, large-scale presentations
- Frame depth 50 mm
- Standard or custom sizes

## 3D Displays

### Cuboid Basic

Cuboid Basic offers lightweight, portable solutions for indoor presentations. Those customised cubes and cuboids are ideal as mobile eye-catchers at trade fairs and events, for window dressing or campaign advertising at the point of sale. Cuboid Basic is made of aluminium tubes that are stuck together. The print is then simply pulled into place.

- Lightweight 3D Display with up to five printed surfaces
- Easy to assemble, without using any tools
- Can also be illuminated

Cuboid Basic

### Cuboid Q-Frame®

Top-quality three-dimensional Cuboids Q-Frame® are the striking centrepiece of any advertising spaces.

Combining a beautifully concealed Q-Frame® profile with top-quality printing gives you visually effective results when designing premium 3D objects. Even attractive pillar trims can be installed with Cuboid Q-Frame®.

Meanwhile, the practical keder system allows each print to be separately replaced.

- Three-dimensional body with up to six printed surfaces
- Can be illuminated

### Prism Basic

The triangular base makes prisms a unique alternative to cubes and cuboids in this product category. Prism Basic can be installed within interiors. Once the top-quality print is stretched into place, it is a guaranteed head-turner at trade fairs, events and at the point of sale.

The system, which comprises lightweight aluminium tubes, is plugged together via connectors, whereupon the

print is simply pulled over the frame. The construction guarantees quick assembly and dismantling while eliminating the need for additional tools. Adding lighting makes these displays even more eye-catching. The internal lighting provides fascinating contrasts.

- Cost-efficient 3D display
- A lightweight plug-in system made of aluminium
- Printed in lightfast colours on crease-free fabrics

### Triple Display

Triple Display gives you three printed surfaces of around 6 m<sup>2</sup> for your messages. The unique set-up allows a range of information to be viewed from various directions. Triple Display also allows three identical or contrasting graphics to be showcased. The display banners are fixed in place by clamping rails. A spring

mechanism in the vertical centre base ensures that the prints are evenly tautened.

- A modern advertising display with three printed surfaces and around 6m<sup>2</sup> of advertising space
- Delivery in a practical transport case
- Graphics can be easily exchanged

### Sidewalk Displays

Sidewalk Displays are the classic go-to option when you want street advertising or at trade fairs and events. At any outdoor location, they inform customers of your latest campaigns and offers. The Sidewalk Displays Outdoor 1 and 2 are exceptionally stable, thanks to the frame elastically supported on special steel springs and the specific base options. All Sidewalk Displays can be equipped with two custom prints showing the same or different graphics.

- Various designs and sizes
- Stable, weatherproof
- Graphics printed on paper

### Info Board

Info Boards were designed for indoor and outdoor applications. The practical poster frames are also usable in either portrait or landscape format. A range of different designs is available. The graphics get printed on high-quality poster paper. Info Board B2, equipped with a maximum of six brochure holders and two poster frames, lets your customers take away informational materials. Info Boards A3 and A4 are often used in showrooms or the F&B industry.

## Barrier Systems

### Café Banner

The flexible components of Café Banners give you room to create many different representative versions to separate seating areas or to direct streams of pedestrians. Café Banners are a high-grade option for guiding visitors on public spaces and events.

The premium and appealing graphics make the Café Banner perfect for sophisticated eateries and hotels, and equally suited for indoor or outdoor use.

The system is made of polished stainless steel. A secure footing is ensured thanks to the metal bases covered with stainless steel. The brilliant prints are pushed onto the cross bars and can be replaced at any time. Of course, you are also free to use double-sided prints.

- Barrier system of polished stainless steel
- Heavy bases with a durable stainless steel cover ensure safe stability
- Single- or double-sided prints

#### Recommended sizes

### Barrier System

The Barrier System, as well as offering a good price-performance ratio, is ideal for use at sporting events, trade fairs or as a visitor guidance system in public areas.

The system is made of individual aluminium tubes (Ø 25 mm) joined with PVC connectors.

- Cost-effective barrier system with a simple modular construction method
- Round it off with various base options
- Continuous designs are possible
- Single- or double-sided prints

#### Recommended sizes single-field version

### Fence Scrims and Jackets

On various occasions and events, crowd barriers are used as security fences or to guide visitors. Fence Scrims and Jackets for barriers are also effective advertising spaces for event organisers, sponsors or companies.

Fully printed fence scrims and jackets are available in three standard sizes, making them suitable for conventional crowd barriers (e.g. demarcation barriers, demo barriers). Graphics are printed on durable and long-lasting materials. Fence Scrims can also be continuously printed and delivered on a roll.

The banners can be quickly and easily attached to the barriers with cable ties or elastic cords. The jackets are pulled over the crowd barriers and attached to the frame through eyelets.

- Durable PVC banners with metal eyelets, printed on one side
- Textile jackets made of non-woven polyester or breathable Varioflag® A SE
- Can be attached to standard crowd barriers

Standard sizes			
Fence Scrims for crowd barriers W x H in cm	Suitable for crowd barriers Size	Jackets for crowd barriers W x H in cm	Suitable for crowd barriers Size

233 x 75	250 x 110 cm	250 x 82	250 x 110 cm

### Portable Panels

Portable Panels are the perfect choice for good value three-dimensional advertising spaces and pitch perimeter advertising. Their light weight and the use of a simple frame construction means they can be assembled or dismantled in no time and without using any tools. Making them ideal as mobile guidance systems and direction signs at trade fairs and events.

The system consists of lightweight aluminium tubes, joined with PVC connectors. You can choose between fabric or reasonably priced non-woven polyester for the printed cover. To assure a save stand when using the system outdoors, ground hooks or water-fillable weight bags are available to ensure stability.

- A simple and economical slot-in system
- Expandable via connectors
- Available options: open with two printed panels or all sides covered with five printed panels

Portable Panels

## Wall Frames

### Wall Frame Q-Frame® 15/25

Wall Frames Q-Frame® prove their worth with a contemporary and premium look.

Only 15mm deep, the exceptionally shallow frame makes them perfect for wall-mounting, not to mention their exceptional price-performance ratio. Their super-sturdy and sophisticated design with profile depth of 25mm is particularly well-suited as a vehicle for showcasing large-scale, textile wall- and ceiling coverings.

- Elegant and ultra-slim wall frames made of aluminium
- Two frame depths: 15mm, 25mm
- Prints can be easily attached and replaced via keder

Q-Frame® profile 15

Q-Frame® profile 25

### Wall Frame Q-Frame® double-sided

One frame – two views.

When suspended from ceilings or cross-beams, the top-quality double-sided Q-Frame® advertising medium is an eye-catching must-have at the point of sale, during exhibitions and product presentations.

The frame system can be covered on both sides. Thanks to the keder sewed onto the brilliant prints, changing the motif is more than easy.

The combination of opaque and transparent materials allows interesting 3D effects to be generated.

- An elegant advertising frame to be suspended from ceilings and cross-beams
- Frame depth 50mm
- Identical or contrasting motifs on front and rear sides possible
- Easy attachment and changeover of graphics via keder system

Q-Frame® profile 50

## Snap Frame

The classic snap frame is also a perfect way to display posters made of paper simply and cost-effectively. Usable in portrait or landscape format, e.g. for retail advertising posters, posters on office walls or escape and rescue routes.

Snap frames are characterised by fast and tool-free poster changes.

- Quick-exchange frames for posters in four standard sizes
- Profile width 32mm
- Drill holes on the rear side for wall-mounting
- Lightweight and long-lasting

Snap Frame	System size WxH in cm	Print size WxH in cm
DIN A0	88.4 x 123.0	84.1 x 118.9
DIN A1	63.0 x 88.4	59.4 x 84.1

### Light Boxes

#### Snap Frame LED

Snap Frames LED let your message shine bright day and night without wasting energy! The brilliance of the colours is even more impressive with the use of LED backing. The latest LED edge lighting and built-in deflector plate help ensure smooth illumination of the print. The ingenious snap frame mechanism enables to exchange your graphics at any time.

- Super slim and space-saving, frame depth only 20 mm
- Energy-saving LED lighting
- Remains lit up to 100.000 hours

Snap Frame LED	System size W x H in cm	Print size W x H in cm
A0	88 x 122	81.4 x 116.3
A1	63 x 88	56.8 x 81.6
A2	46 x 63	39.2 x 57.3

#### Light Box Q-Frame® LED

Brighten your ideas. Light Boxes Q-Frame® LED present your custom graphics in an elegant and flexible manner. They combine a top-quality aluminium frame with perfectly tensioned textile prints. The backlighting gives each motif a truly unique depth and intensity. The frame itself fades into the background, leaving the full spotlight on your message. Light Box Q-Frame® LED is suitable for wall-mounting within interior spaces. To facilitate transport, the system is pre-assembled and delivered in dismantled form. The Light Box Q-Frame® LED brings tried and trusted tension frame systems together with the latest LED technology: bright, energy-efficient, durable. Top-quality high-power LED straps ensure intensive and smooth backlighting of the graphic. The long service life

and low power consumption of the LED lighting guarantees that they can be used in both an economical and resource-saving manner.

- Custom sizes and formats possible
- Prints can be quickly changed with no special tools
- Bright and energy-efficient power LEDs that last up to 22.000 h
- LED components factory pre-assembled

## Hanging Displays

### Hanging Displays of aluminium tubes/profiles

Express your advertising the way you want! A range of aluminium profiles can be curved to individual specifications or combined to form three-dimensional Hanging Displays. Combining different shapes and illuminating them opens up new perspectives in the quest to convey your advertising messages at trade fairs, events or at the point of sale. The textile prints stand out for the brilliance of their colours and pin-sharp details. Customised radii and shapes can be implemented: Ceiling trims, curves, cylinders, cubes or

cuboids – only the best, whatever the shape. Simply choose out of the range below or create a new shape according to your requirements.

- Lightweight Hanging Displays with good price-performance ratio
- Including mounting, BGV-C1 compliance possible
- Ease of transport and space-saving storage with units delivered in dismantled form

# Gazebo Select and Pop Up Tent Select

## Gazebo Select and Pop Up Tent Select

Gazebo Select and Pop Up Tent Select are professional tent systems for presentations and other occasions. Proving their worth in terms of functionality, durability and flexibility. A solid foldable framework of rust-free aluminium and top-quality hexagonal profiles guarantee the system remains super-stable. The tent poles are height-adjustable in 5 levels. Full-surface, full-colour printed roof covers, valances and side walls stand for a high grade of individuality. Thanks to the hook-and-loop tape sewed onto the walls on both sides, the graphic can be prominently attached to the interior or exterior of the folding tent and displayed as required. An additional lamination means all prints remain waterproof, UV-resistant and exceptionally scratch-resistant.

- High stability with poles made of top-quality hexagonal profiles
- Fully printable in full colour design
- Waterproof and scratch-resistant through additional lamination after printing
- Comprehensive selection of walls: solid walls, half-height walls, walls with windows and doors

Transport Trolleys in two sizes with handle and rollers ensure the tent system can be transported safely.

Gazebo Select/Pop Up Tent Select	Base W x H in cm	Overall height	Overhead clearance	Weight	Walls

- Size (W x H): 150 x 200 cm

#### Corner Curtains

Attractive decoration made of shiny, flame-retardant knitted polyester

- 20 stock colours available
- Attachment with hook-and-loop tape to the valance and roof
- Tieback for fixation to tent poles
- Size (W x H): 80 x 200 cm

#### Bow XL

Party decoration for folding tents and gazebos, in stock colours and five different standard lengths

- Loop made of polyester, with fastening strap
- Lengths: 80 cm, 100 cm, 150 cm, 200 cm, 250 cm
- 20 stock colours available

#### Bowflag® Basic

Available in sizes XXS – S with customised print or in 20 stock colours

- Various versions: with drop shape or flying shapes
- Bowflag® brackets for tent poles, vertical or at 30°

#### Ice Cream Flags

Ice Cream Flags printed on both sides, made of robust vinyl, with flag bracket 75°

- Printed on both sides
- With suitable holder: for attaching
- Two sizes: 46 x 35/47 cm, 46 x 52/64 cm

#### Changeable Banners

For short-term campaign advertising on tent walls and valances

- Exchangeable banner for short-term outdoor use
- Attachment with hook-and-loop tape
- Fully printed in four colours
- Flame retardant material

Tent pegs in T-shape

Weighting plates 18 x 20 cm/5 kg

Water filling weights 7.5 l

Flooring sheets and stakes

# Large-format Banners

Large-format Banners are highly effective and striking advertising tools for events, products and information. Printed on one or both sides with customised graphics, they can be fixed to buildings, facades and fences.

Large-format Banners are used more and more frequently, including for creative interior concepts, trade fair stands, exhibitions and entire stage designs. The scope of use here also includes materials in flame retardant versions.

Execution and finishing of your banner are tailored to the specific requirements of your application: All sides cut, with edge reinforcement, eyelets, sleeve or keder.

- Banner systems for mounting Large-format Banners to walls and facades
- Large-format Banners available as barrier signage and scaffold advertising
- Fence Scrims and Jackets for crowd barriers available (more information on p. 27)

## PVC Banner

Long-lasting PVC Banners are very popular, particularly for large-scale and prominent outdoor advertising.

The PVC Banner Basic is cut on all sides without additional edge reinforcement which guarantees for an exceptional price-performance ratio. They are available with metal eyelets, Grip Clips or transparent, recyclable plastic eyelets.

PVC Banners, finished with

reinforced edges and metal eyelets, are ideal for use under particularly demanding conditions, where their longevity is assured.

- Shiny vinyl banners in flame retardant version, printed in striking colours with high lightfastness
- PVC Banner Basic with an exceptional price-performance ratio
- Various mounting accessories can be ordered

PVC Banner with metal eyelet, edges reinforced

PVC Banner with plastic eyelet, all sides cut

## Mesh Banner

Air permeable Mesh Banners benefit from a reduced wind resistance in comparison to customary PVC banners – further enhancing its durability when used outdoors.

The web-like, translucent material is perfect for large-scale advertising designs on facades and window showcases, since more daylight can shine through it and into adjoining rooms.

One further advantage of mesh

banners is their low weight. Flame-retardancy also makes them ideal for trade fairs and retail shops. A wide range of accessories is available for attachment purposes.

- Breathable and translucent mesh banner for various indoor and outdoor applications
- Cost-efficient Mesh Basic B1/M1 (ca. 300 g/m<sup>2</sup>)
- Durable Mesh Premium B1/M1 (ca. 350 g/m<sup>2</sup>)

Mesh Banner with metal eyelet, edges reinforced

Mesh Banner with Grip Clip Midi black, cut

## Banner Frames

### Banner Frame (Wall)

The Banner Frame (Wall) allows banners to be attached to walls either indoors or out: at trade fairs and exhibitions, in foyers and waiting areas or at the point of sale.

The print remains in place using a rail at the upper and lower edge of the advertising banner. The rails are easy to install on a wall, with stable mounting attachments. The rust-proof and stable Banner Frame (Wall)

is also characterised by its low requirement of maintenance. It is available in two versions. The flexible system can also be deployed outdoors as a closed frame. The horizontal and vertical tensile wall brackets ensure optimal stability.

- Available in two versions: rail at the upper and lower edge or as completely closed frame
- Banners can be exchanged at any time

### Banner Frame (Facade)

This Banner Frame (Facade) can be used to attach banners outdoors to facades.

The flexible tension system combines high-quality material with easy handling: The advertising banner is kept taut using a stable expander-rope in the fixing clip installed on the frame. This makes changing graphics quick and easy.

The Banner Frame (Facade) is available in numerous sizes. Thanks to the stable wall brackets, large formats are also feasible. The system can be expanded on a modular basis as required.

- Very large-scale formats possible without support profile
- Statically tested system

### Banner Lift

The Banner Lift allows optimally expedited switching of Large-format Banners without any need for extra scaffolding or hydraulic platforms.

The simple crank-operated device ensures that banners with a max. height of 2,000cm and width of 1,400cm can be easily replaced. The individual system components are delivered pre-assembled. This helps guarantee swift and easy assembly. Alternatively, as a freestanding option, the Banner Lift can be used for single- or

double-sided presentations up to a size of 600 x 600 cm.

- Can also be operated from the roof
- Pre-assembled delivery
- Crank control for high user convenience

### Barrier Signage

#### A-Panels

The modern A-Panels combine the advantages of Sidewalk Displays and large-scale Barrier Signage. They excel when it comes to flexible presentations of Fence Scrims. Combined with various ground fittings, they can be used on both hard and soft ground. For the covering, robust vinyl banners or breathable mesh banners are used. With cable

ties, attaching eyeleted PVC banners couldn't be easier.

- Single- or double-sided covering possible
- Various ground fittings, usable on hard or soft ground

System size W x H in cm	Base W x H in cm	Print size W x H in cm
200 x 335	200 x 200	174 x 338

#### Single Panels

Single Panels are the classic option for construction site advertising. This versatile advertising medium can be barrier, advertising space and privacy shield all in one and is increasingly popular for use in event announcements and product advertising. Regardless of whether singly, in series or individually arranged, advertising messages on barrier fences offer guaranteed prominence. They can be attached with cable ties, for

example. Single Panels with weatherproof covering are intended for long-term outdoor use. When combined with suitable ground fittings, they can be used on hard or soft ground.

- Single- or double-sided covering possible
- Various ground fittings, usable on hard or soft ground

System size W x H in cm	Print size W x H in cm
200 x 350	174 x 338

#### Scaffold Advertising

Use scaffolding as a medium for conveying advertising or as an information space. Scaffolding banners are a practical and economic option for attracting target groups or passers-by directly on-site. Once the construction work is complete, the weatherproof prints can be removed and reused elsewhere. Scaffolding banners can be used over one or two scaffold levels. No

additional equipment is needed to attach the advertising to the scaffolding. As required, you can select from a range of materials.

- High durability with low weight
- Reusable, therefore cost-effective

Size W x H in cm	
1 Scaffold level	200 x 205 250 x 205
2 Scaffold level	200 x 410 250 x 410

# Flagpoles

## Flagpoles

When you purchase poles from Sachsen Fahnen/Vispronet®, you are getting tried and tested quality produced in Germany. Continually refined and improved, the conical or cylindrical flagpoles available offer unbeatable functionality, durability and safety.

Top-quality alloys are used to produce the elegant aluminium flagpoles, which retain their value. They have been statically tested up to a wind speed of at least 9 Beaufort (approx. 88 km/h). However, flags should be taken down in exceptionally strong winds or storms. The flagpoles are available in options from 5 to 12 m high. Depending on the selected flagpole, various ground fittings and other accessories are also available.

We offer a five-year guarantee on the pole tubing and a two-year guarantee on functional components. This is contingent on proper construction and assembly as well as proper maintenance. Wear parts and damage from strong winds are not covered by the guarantee.

- Top German-made quality
- Options: without banner arm, hoistable or non-hoistable banner arm
- TÜV (Technical Inspection Association) approved
- Five-year guarantee on all flagpoles

## Portable Flagpoles

### Budget Flagpole

With a height of up to 6.20 m, Budget Flagpole is guaranteed to be seen. Its ease of handling and exceptional price-performance ratio are what make this weatherproof telescopic mast so popular. For long- or short-term use, Budget Flagpole allows you to showcase your club, national or advertising flags in front of buildings and parks. Comprising five pole segments which can be joined together,

the lightweight and stable flagpole can be set up in a few minutes. As well as the plastic ground sleeve included in delivery, additional ground fittings are also available.

- Flagpole consisting of five segments with an unbeatable price-performance ratio
- Height can be adjusted by reducing the number of pole segments
- Plastic ground sleeve included in delivery

#### Budget Flagpole

Pole	· Silver-coloured anodised · Five-piece · Pluggable
Flagpole top	· With deflection pulley and silver finial
Use	· Outdoors · Indoors
Height	· Max. 6.20m

### T-Pole® 100

Modern telescopic poles are the flexible solution for mobile flag promotion within interior spaces or short-term campaign advertising outdoors. At up to 5.40m high, they remain prominent even from a considerable distance. The rotatable banner arms also guarantee that the flags wave fully unfolded at all times. For a safe stand, T-Pole® 100 can

be combined with various base options and put together quickly and easily.

- Portable, lightweight telescopic pole with rotatable banner arms
- Telescopic pole, four-stage, height-adjustable
- Simple assembly and dismantling with no extra tools
- Various base options and ground fittings available

#### T-Pole® 100

Telescopic pole	· Silver-coloured anodised · Four-piece, Ø external 55mm
Banner arms	· 360° rotatable · Length 120 cm, Ø 20 mm
Use	· Indoors · Short-term outdoor use
Height	· Height-adjustable, four levels · Max. height 5.40m

Pole height-adjustable in 4 levels, locked using spring buttons

### T-Pole® 200

T-Pole® 200 are portable flagpoles. The height of the pole itself can be adjusted freely. The telescopic pole is locked via counter rotation of the individual pole segments. This allows the pole to be adjusted to any height, depending on your requirements and ceiling height. Thanks to the rotatable banner arm, the flags remain fully unfolded within interior spaces or for short-term campaigns outdoors and can be

seen well from all sides. During transport and storage the flagpole can be stowed space-saving within the supplied transport bag. Depending on the purpose of use, a wide range of base options can be selected from.

- Portable telescopic poles with rotatable banner arms
- Telescopic pole continuously height-adjustable between 220 and 600 cm
- Various base options and ground fittings available

#### T-Pole® 200

Telescopic pole	· Silver-coloured anodised · Four-piece, Ø external 55mm
Banner arm	· Rotatable · Length 120 cm, Ø 20 mm
Use	· Indoors · Short-term outdoor use
Height	· Continuously height-adjustable from 2.20 up to 6.00m

Pole continuously height-adjustable, locked via counter rotation

# Advertising Signs

Advertising signs have versatile applications: as signposting for corporate premises or public spaces, construction signs, stage or platform decorations, product presentations or customised wall installations.

Create advertising signs with your own graphics, logos or lettering. The latest UV printing technology allows printing in high-resolution quality. To round things off, a large selection of stainless steel wall- and ceiling-mountings are available.

- Versatile applications: e.g. as advertising or data boards, guide signs, election posters, signposts, for announcements or visitor guiding
- Sign boards for every budget: options with a good price-performance ratio, or premium and high-end models

Substrates			
<b>Foam Board</b> <ul style="list-style-type: none"> <li>Advertising and exhibition classics</li> <li>Low weight, well printable, excellent colour rendition</li> <li>UV-resistant</li> <li>Can be used either indoors or outdoors</li> <li>Panel thickness: 3 mm, 5 mm, 10 mm</li> </ul>		<b>Acrylic Glass</b> <ul style="list-style-type: none"> <li>Usable for high-class signs and posters, interior design, trade fair decoration and shop fitting, illuminated signs</li> <li>Graphics with enormous image depth</li> <li>Polished edges possible</li> <li>Can be used either indoors or outdoors</li> <li>Panel thickness: 3 mm, 5 mm, 10 mm</li> </ul>	
<b>Lightweight Foam Basic/Select</b> <ul style="list-style-type: none"> <li>Flexible substrate for displaying advertising signs or interior design elements</li> <li>Low weight, well printable</li> <li>Lightweight Foam Basic: amazing price-performance ratio</li> <li>Indoor use</li> <li>Panel thickness: 3 mm, 5 mm, 10 mm</li> </ul>		<b>Twin-wall Sheets Type H</b> <ul style="list-style-type: none"> <li>Lightweight and flexible material for short-term event announcements, election advertising or outlined signs</li> <li>Stable, totally weather-resistant and completely recyclable</li> <li>Can be used either indoors or outdoors</li> <li>Panel thickness: 2 mm, 4 mm</li> </ul>	
<b>Aluminium Composite Panels SE</b> <ul style="list-style-type: none"> <li>Ideal for outdoor pylons, displays and top-quality advertising as well as information boards</li> <li>Shock-resistant and break-proof, weather-resistant</li> <li>Can be used either indoors or outdoors</li> <li>Panel thickness: 3 mm</li> </ul>		<b>Twin-wall Sheets Type X</b> <ul style="list-style-type: none"> <li>Durable material of low weight for advertising campaigns, announcements or trade fair installations</li> <li>High stability, weatherproof, recyclable</li> <li>Can be used either indoors or outdoors</li> <li>Panel thickness: 10 mm</li> </ul>	

## Company Signs

Company Signs are corporate business cards. They include plenty of space for logos, company names or to spread important information in a prominent and easily visible manner. A door sign or info sign helps orient people and give directions to customers or visitors. Company Signs are made of lightweight, weatherproof foam boards, transparent acrylic

glass or of stable aluminium composite boards. Various wall mountings made of stainless steel are available for fixation in indoor spaces.

- Can be ordered in standard or custom sizes
- Also available as flame retardant version
- Indoor or outdoor use possible
- Numerous accessories for wall mounting and hanging can be ordered from stock

### Construction Signs

Construction Signs help to inform during the entire construction phase, from the groundbreaking to the tape-cutting. They provide information about properties and construction works, give details about public works and their progress. Furthermore, they provide long-term and customer-oriented advertising for your company. The possibilities of attachment are versatile. Depending on the size and

purpose of use, impact-resistant aluminium composite panels or foam boards are available in various material thicknesses. Construction Signs and panels are cut on all sides and supplied with corner drillings or rounded corners for example. A range of materials and finishes is available for the panels, as well as an extensive selection of accessories.

- Made of various materials
- Can be ordered in standard or custom sizes

### Lawn Signs

Lawn Signs are small and practical aids for your promotion. They project advertising messages, logos or information directly on-site and within view of customers. Lawn Signs made of weatherproof Twin-wall Sheets Type H can be printed on one or both sides with the same or different graphics. The stainless wire stake ensures that they can be quickly and flexibly placed outdoors. Simply

insert the rods into the flutes of the Twin-wall Sheet, stick into the ground – done.

- Use for example as advertising or campaign signs, temporary event signage for announcement and guidance
- Various shapes: rectangular, square, round, oval, triangular or arrow form
- Additional wire stakes (single stakes) also available as accessories

### Outlined Signs

Signs with customised outlines provide prominent projection for advertising messages and information. Printed with brilliant colours, they offer extensive space for creative designs e.g. at trade fairs or in shop windows. Outlined Signs can also be used as a freestanding display to promote your products and services at the point of sale. The outlines are configured in line with your requirements and

specifications. Depending on the purpose and place of use, various substrates can be selected to produce the outlined signs. To ensure a perfect set-up of graphics at the usage location, a wide scope of accessories is also available.

- Can be ordered as display or sign panel
- Substrates: Foam Board, Lightweight Foam, Aluminium Composite
- Usable indoors or outdoors

# Posters

Photos as works of art! Posters give any residential or working area that authentic gallery feeling.

Premium top-quality posters make perfect gifts for business partners or friends.

Printed on textile materials, acrylic glass, foam board or aluminium composite panels, nothing makes your graphics stand out more.

Rounded off with stretcher frames, aluminium frames or sign fixings made of stainless steel, graphics can become top-quality decorations and modern pieces of art.

- Various materials
- In standard and custom sizes
- A large selection of accessories available to round off the range

## on Canvas

Photos and images printed on canvas showcase special moments and valuable memories in a truly unique way. Works of art reproduced on canvas are akin to originals.

The natural fabric structure and wooden stretcher frame give posters a truly individual and top-quality feel. Wooden joints ensure the print to be always perfectly stretched.

The stable timber wedges of

the frame are made of all-natural spruce wood which is very durable and twist-proof. The wood originates from sustainable, ecological forestry.

- Stretcher frames covered with prints on different canvas fabrics
- Printed on canvas with lightfast, UV-resistant colours
- Graphics are continuously printed on the edges
- Prints get fixed on the rear side of the frame

## on Fabric

Elegant and classy: Fabric posters prove their worth with durability alongside a unique look. Their ease of handling makes them a popular choice as an advertising medium or decorative feature at trade fairs and exhibitions, the point of sale or in residential and business surroundings.

Round off posters using the modern Wall Frame Q-Frame® made of aluminium. These posters include a keder, which can simply be pushed into the

groove of the frame. This lets posters be switched easily at any time.

Posters with metal tubes on the upper and lower edges lend an elegant and sleek impression. Select the right tubes from four colours and two sizes.

- Available in standard or custom sizes
- Q-Frame® available in two profile depths
- Metal tubes in gold, silver, black and white

### on Boards

Posters with a frameless finish are guaranteed to make your chosen graphics or advertising messages stand out. They can be made of e.g. lightweight foam or stable twin-wall sheets, which helps to reproduce authentically any design and can be used anywhere. Put your photos in the spotlight. Placing them behind acrylic glass creates an impressive sense of spatial depth. The graphic has

moreover a white back-coating, which guarantees outstanding vibrant colours. Premium, break- and impact-proof aluminium composite panels have proven quality with excellent printing quality and extended durability.

- Materials with various properties in custom sizes
- A large selection of top-quality sign fixings and ceiling-mounts made of stainless steel

### Snap Frame Posters

Practical aluminium snap frames showcase posters printed on paper cost-effectively and in a manner optimising the ad impact. They are both durable and super-light. The snap frames can be deployed in a range of ways in portrait or landscape format, e.g. for retail advertising, wall posters or plans for escape or rescue routes in buildings. Snap frames are well-liked for their easy and tool-free poster

changes. Rounded corners in a chromium-look give each poster a truly unique appearance.

- Available in 4 standard sizes
- Profile width of the frame: 32 mm
- Drill holes on the rear side for easy wall-mounting

Snap Frame	System size W x H in cm	Print size W x H in cm
DIN A0	88.4 x 123.0	84.1 x 118.9
DIN A1	63.0 x 88.4	59.4 x 84.1
DIN A2	46.3 x 63.0	42.0 x 59.4
DIN A3	34.2 x 46.5	29.7 x 42.0

### Snap Frame LED Posters

The slimline Snap Frame LED brings posters into the light! The most cherished holiday memories, portraits, product- and corporate advertising – all brought to life with a special intensity. The long-lasting illuminant and the ease of changing graphics are what make this Snap Frames LED stand out. The poster is printed on a translucent backlit film. Thanks to the deflector plate and the built-in edge lighting, the graphics are lit up evenly.

An anti-reflex cover film prevents mirroring and light reflections off the poster.

- Extra-slim and particularly energy-saving
- LED lighting with a life expectancy of up to 100,000 hours

Snap Frame LED	System size W x H in cm	Print size W x H in cm
A0	88 x 122	81.4 x 116.3
A1	63 x 88	56.8 x 81.6
A2	46 x 63	39.2 x 57.3

## Stickers and Films

Stickers and films are cost-efficient and outstanding media for advertising messages and information.

A range of materials with various properties and effects opens up new fields of application.

Removable or permanently attached films, window or adhesive films as well as textile stickers and films with a sandblasted effect create a unique and appealing look. Films for display systems and backlit film for backlit graphics allow for top-quality presentations.

- Stickers and adhesive films in large format as well as smaller stickers or labels from 5 x 5 cm
- Permanently adhered in place or removable with no residues

### Stickers

Stickers with customised graphics are flexible advertising media for even low budgets. They can be attached to any flat surfaces, giving them a great opportunity to impress large audiences.

In compact format (e.g. stickers or labels) or as an XXL sticker, they are ideal for use at the point of sale, for promotional campaigns, for corporate applications and trade fair stands.

Stickers come in various materials: as adhesive films, window films or floor stickers.

Surprisingly different – textile films as an alternative to common stickers. The fine fabric structure gives them a truly special look and feel.

Stickers behind glass are fixed onto the inside of shop windows. The mirror-image print spreads the information and designs perfectly visible to all viewers on the outside.

- Self-adhesive
- Use on flat surfaces
- Window films can even be fixed behind glass
- Materials with different surface structures and appearances

#### Stickers

##### Adhesive Films

- Attachment: will stick to all flat surfaces
- Can be used either indoors or out
- Adhesive Film white, permanently adhering, ca. 100 µm
- Adhesive Film, white, removable, ca. 100 µm
- Adhesive Film, transparent, removable, ca. 100 µm
- Textile Adhesive Film, white, removable, ca. 100 µm

##### Window Film

- Permanently adhered with sandblasted effect
- Applications: printed or unprinted, usable on all flat surfaces, reliable and attractive visual protection for windows and glass doors in customer or waiting areas (e.g. in foyers, restaurants, medical practices, wellness areas or winter gardens)
- Long-term use within interior spaces
- Silver-coloured, translucent

##### Floor Stickers

- Attachment: to floors (e.g. in restaurants, shopping centres, hotels or gymnasiums)
- Usable within interior spaces and leaves no residue behind when removed
- Non-slip in accordance with DIN 51130, class R10
- Outlined cut possible

## Sticking Films

Advertising which remains in place – entirely glueless! Sticking Films can quickly and easily be attached to glass and other flat substrates. Apply films to windows, doors and other surfaces, product introductions, promotional campaigns or short-term campaign advertising at the point of sale.

Sticking Films can be removed, leaving no residue behind, and subsequently reused.

They come in various materials and finishes. Depending on the purpose of use, films with different adhesion characteristics or films with micro suction cups are available.

- Self-adhesive, no glue required
- Removable with no residue
- Reusable many times
- Various materials: Window Cling Films or Sticking Films, adhesion via suction cups

### Sticking Films

#### Stafix® Films

- Electrostatic adhesion
- Attachment (depending on the selected film): on glass, behind glass, on furniture, paper, flat walls, on electronic devices (e.g. TVs, computers, fridges, microwaves) or as wall posters
- Slidable
- Indoor and short-term outdoor use
- Reusable
- Options: white, transparent

#### Window Cling Films

- Bonded via adhesion
- Attachment (depending on the selected film): on or behind glass (e.g. shop windows, vehicle windscreen) or on surfaces similar to glass
- Indoor and short-term outdoor use
- Reusable many times
- Options: white, transparent, frosted

#### Microsuction Films/Yupo® Films

- Adhesion via micro suction cups
- Attachment (depending on the selected film): on glass, behind glass, on furniture, metallic surfaces (e.g. vehicles, electronic devices)
- Indoor and short-term outdoor use
- Reusable many times with no loss of adhesion
- Options: white, transparent

## Films for Display Systems

Films for display systems showcase advertising messages, information or images in a premium and exclusive manner. Display film is well suitable for e.g. Roll Ups or X-Displays. A winner with its brilliant rendering of colour, the best choice for printing high-resolution motifs. Backlit films are the top choice for backlit displays, for light boxes or illuminated snap frames. When choosing this material, the backlighting ensures maximum attention and effectively spotlights your graphics.

- White display film
- Transparent display film
- Backlit film: shiny, translucent polyester film

### Films, non-adhesive

#### Display Film

- Applications: use with display systems e.g. Roll Up displays or X-Display
- Indoor use
- White, semi-matt Display Films 240 µm and 450 µm: opaque, anti-reflective and scratch-proof
- Display Film 175 µm, transparent: designs seem to be floating and like an outlined cut, white back-coated graphics make the colours particularly vibrant

#### Backlit Film

- Applications: for advertising in backlit displays, light boxes or frames, e.g. Snap Frame LED
- Indoor use
- Shiny, translucent polyester film, ca. 150 µm
- Custom sizes and DIN formats
- Highest lightfastness and brilliant colours – even with permanent exposure to light

# Table Top Products

## Bannerettes and Pennants

Bannerettes and pennants are hugely popular options for corporate and brand presentation use, at trade fairs or at the point of sale. For associations or sports clubs, they also help symbolise belonging and solidarity. Bannerettes are available in various classic shapes, rectangular, with straight or pointed lower edge, and in triangular pennant form. They come in unique shapes or customised outlines according to your specifications. These banners make an immediately visible impact on tables, reception desks and sales counters. The graphics are printed on lightweight and shiny polyester silk in top quality and in striking colours. Matching banner stands are available on request.

- Optionally available with cord, loop fringe or cut fringe
- Select the cord and fringe colours to match your design, from up to 23 stock colours
- Single or double-sided printing available
- Decide for presentations with impact: choose out of many different banner stands

## Table Flags

Table flags come in the standard size of 25 x 15cm. The selection includes a wide range of national and international table flags as well as various other special flags from our warehouse. Table flags with logos, advertising messages or customised prints make a striking and decorative accessory for conference tables

- and sales counters. Order matching banner stands of chrome or wood as accessories.
- Customised printed, or as federal state flags, national flags, special flags
  - Semi-matt material with brilliant colour reproduction

## Table Display

Modern, elegant Table Displays provide the perfect frame for offers, information or photos.

The brilliant print is perfectly stretched using two bars on the upper and lower part of the frame. On both the front and rear sides, there is scope to show the same or different graphics.

Table Displays are prominent informative and decorative elements on counters or reception desks as well as appealing presents for business partners.

- Available in three sizes
- An elegant aluminium frame with a stable pedestal
- The whole year at a glance: Table Display as a calendar

Print size W x H in cm	21.1 x 32.5	11.0 x 32.5	11.0 x 20.5

## Bowflag® T

This popular table top product imitates the well-known design of large-scale feather flags. With a total height of 55 cm and a print size of 29 x 50 cm, there is more than enough space for creative designs. For Bowflag® T with its unique drop shape you can choose between single- or

double-sided designs. With double-sided Bowflag® T, both front and rear sides can have identical or contrasting graphics applied.

- Flexible glass fibre pole and chromed base
- Ideal for counters, tables, exhibitions and promotion stands at the point of sale

## X-Display T

This economical and flexible display rack is made to point out customer-oriented offers, products and services.

The print is simply tightened at the rod ends of the system and can be replaced at any time quickly and easily. The three-base system with plastic crossbars

guarantees secure footing. For storage and transport, X-Display T folds down flat, taking up minimal space.

- Small, lightweight display with a particularly good price-performance ratio
- The print is held in place by plastic rods arranged in a crossover pattern

System size W x H x D in cm	Print size W x H in cm
27.0 x 45.0 x 16.0	25.0 x 40.0

## Q-Frame® T

The display with subtle acrylic bases conveys advertising messages in a modern and effective way. The ease of handling and the fact that prints can be replaced quickly and easily make Q-Frame® T usable for a wealth of applications: on bars, counters, at trade

fairs, in commercial booths and consultation areas. A flat keder sewn on to the edges of the print is pushed into the groove of the aluminium frame. This helps ensure the graphic can be tightened without creases.

- Available in various sizes up to max. DIN A1
- Low frame depth: 15 mm

# Parasols

## Promotional Parasols

Parasols are unique points of attraction whatever the occasion. They protect against the sun and showcase brands or companies prominently and decoratively. The tiltable canopy can always be kept inclined in the right direction to ensure customers and guests are continually protected against the sun. The canopy made of top-quality, quick-dry branded polyester offers generous space for customised designs. The binding is available in 10 stock colours and can be selected to match the colours of your printed graphic. Digitally printed Promotional Parasols can be ordered from one piece and without minimum quantity. Various parasol bases are available as accessory.

Portable Promotion Sets round off each individual advertising campaign. Combine parasols with a foldable bar table (Ø 70cm, Ø 80cm) and a Table Cover featuring a suitable design. For more information, see page 58.

- Good print through: graphics are visible on the bottom side
- 2-part cover available with less seams for detailed graphics
- Water-repellent (hydrophobic) finishing can be applied on request

### Large-scale Parasols

Their impressive canopy makes these parasols ideal ways to shelter from the sun for eateries, for deployment on sun terraces and during outdoor campaigns. The large shading area made of durable material means extra advertising space for your graphics.

Large-scale Parasols with a screen-printed canopy win over through proven quality and a good print through.

Their construction is solid, maintenance-free, easy to work with, and therefore ideal for daily use. The frame is made of hollow aluminium profiles with white powder coating and corrosion-free frame parts. A cable pull can be used to open the canopy in no time.

To hold your parasol firmly in place, look no further than the suitable parasol bases from our accessories range.

Why not make your advertising campaign even more impressive and combine Large-scale Parasols with printed folding furniture consisting of tables and benches?

- Parasols with round or square designs
- No minimum quantity
- Coloured binding: Selection of 10 various stock colours
- Weather-resistant and rainproof up to at least 300 mm of water

## Seating Units

Seating Units offer ultimate flexibility whatever the setting. They can be combined freely depending on requirements and wishes and subsequently rearranged at will. Whether used individually, in different arrangements or as customised Seating Lounges, your imagination is the only limit. Seating Units help set the tone in lounges, reception and children's areas, meeting points or at trade fairs and events. The covers are made of robust, crease-resistant polyester fabric.

printed at high resolution. The units have cores of top-quality, stable foam.

- Cores and covers certified in accordance with the Oeko-Tex® Standard 100
- Individual units with a seating height of 45 cm can be combined at will within any seating configurations
- Covers can be washed and replaced

## Seating Lounge

Looking for an original and convenient design element with abundant seating options or a solution for confined spaces? Seating Lounges are the answer! The Seating Lounge is made of two curved units and the central cylinder, which functions as a

backrest. With just a few moves you can transform the entire shape of the Seating Lounge by repositioning the single units. This gives even greater flexibility in their use.

- Three-part Seating Lounge, all sides of the single units can be custom-printed
- Can be combined with cubes and cylinders or other units

## Cylinder Seats

Creatively designed cylinders turn heads and round off any advertising campaign perfectly. They offer almost unlimited potential in the form of a seating arrangement or design element, both for private and business use.

The cover made of crease-resistant polyester material guarantees brilliant colour rendition. The print is replaceable and washable at any time. The materials used for the core and cover are durable, environmentally friendly and certified in accordance with the Oeko-Tex® Standard 100.

- Continuous graphics are possible
- Three advertising surfaces
- Individually deployable or stacked as towers

### Cube Seats

Sit, build, play, advertise, attract – nothing could be easier with Cube Seats! The versatile units stand out for their flexibility. Whether as exceptional seating arrangements at trade fairs, exhibitions, in lounge areas or in children's rooms – Cube Seats are always able to generate atmosphere and fun. Six printable surfaces offer lots of space for your graphics and messages. Whether individually, as a column or variable hoarding, these units can be continually reconfigured to meet all ongoing requirements and

accommodate new perspectives. All covers and cores are certified to the Oeko-Tex® Standard 100.

- Six printable surfaces
- Cube Seats optionally available as two- or three-seater
- For short-term outdoor use: Cube Seats Outdoor with coated, splash-proof cover

### Beanbags

Comfortable and customised – Beanbags are contemporary pieces of furniture and seats all in one! Their large print surfaces provide optimal seating quality and offer a wealth of potential for advertising messages. This explains why Beanbags are often used as modern advertising media for promotional campaigns, at trade fairs or in lounge areas. Beanbags are available in square

or round design. A separate lining made of polyester fabric includes the filling.

- Washable cover
- If printed on both sides, same or different graphics on front and back side possible

Beanbags square W x H in cm	Beanbags round Ø in cm
140 x 180	120 140

### Cushions

Be comfortable wherever you go! Use customised Cushions to spread your messages. These convenient and decorative Cushions have versatile applications: as cushion on chairs or benches, but also as cosy and practical floor cushions. Printed with logos, slogans or photos, Cushions are a remarkable way to promote products or current offers.

The foam core is both durable and environmentally friendly. All covers can be replaced and washed.

- Available in a round or square design
- Tested for harmful substances and certified in accordance with Oeko-Tex® Standard 100
- Covers depending on design include zipper or envelope closing at the bottom side

### Folding Furniture

Folding furniture is perfect for beer gardens, other occasions, events, weddings or parties with friends. The durable and weatherproof 3-part folding furniture comprises 1 table and 2 benches.

Printed folding furniture is a particularly appealing option. Both the table and benches can be individually printed with designs, logos or graphics over the entire surface. Thanks to a top-quality sealing process, all printed surfaces are scratch-proof and easy to clean.

Table Cloths, Covers and suitably designed Bench Covers transform classic beer tent furniture into elegant items to grace any event or future decorative items.

- Available printed or blank (natural finish)
- Table and seating areas made of solid wood (furniture quality) collapsible
- Table Cloths, Table Covers and Bench Cushions can be printed with a matching design

### Folding Chairs

Folding Chairs are fun and convenient loungers. Deck Chairs, Directors' and Beach Chairs invite customers and business partners alike to take things easy for a moment. At the beach, on the sun terrace, during events, in lounges and at the point of sale, they help to promote brands, products or campaigns.

The frames of our Folding Chairs are made of natural beech wood sourced from environmentally responsible forestry. All coverings can be printed on the entire surface in full colour process.

**Deck Chairs** are available with or without arm rests. Thanks to the 3-stage adjustable backrest, they can adapt their level of comfort within seconds.

**Directors' Chairs** have scope for printing on the seat and the backrest. If required, the

backrest of the Directors' Chairs can be printed on both sides with the same or different graphics on the front and rear side. The prints can be easily replaced.

**Beach Chairs** come in 2 parts as practical and mobile seats for use on the move.

The seat and the customised printed backrest can be quickly and simply put together on site - wherever you go!

- Covers are resistant to seawater, chlorinate water and sweat, certified in accordance with the Oeko-Tex® Standard 100
- Completely printable in full colour process without minimum quantity
- Collapsible for ease of transport and space-saving storage
- Particularly cost-effective: Folding Chairs with mesh covering

### Table Cloths

Table Cloths with specific design and finish are ideal advertising and design features in hotels and restaurants, at trade fairs and events.

They are available in standard sizes as well as in custom formats and delivered with various options for finishing. In addition to the basic finish, you can also obtain printed Table Cloths with binding in various colours. We also offer Table Cloths fitted with hook-and-loop tape or rubber on the back. The durable, washable Table Cloths are immediately ready for use, no additional pre-washing required.

A water-repellent model is possible to protect the Table Cloths from liquids.

- Table Cloths for tables and Folding Furniture with customised printing
- Various shapes: rectangular, square, round, oval
- Water-repellent model also available

### Table Covers

Table Covers transform tables into festive and exclusive eye-catchers. According to your furniture and requirements you can opt for a short or long design. They remain perfectly in place at all times, never slipping and add to the pleasant party atmosphere.

Covers for folding tables and benches further enhance the visual impression of this furniture (more information on page 56). Table Covers for bar tables are simply pulled over the table – quick and perfect covering without any trouble. These elegant coverings are available in three versions. To protect Table Covers against dirt, faceplates of acrylic glass are also available.

- Durable material, washable, non-iron and flame-retardant
- Table Covers and Bench Cushions for folding furniture
- Table Covers for bar tables: Ø 70 cm or Ø 80 cm
- Promotion Set: bar table including Table Cover, combined with a parasol

### Custom Clocks

Advertise around the clock! Custom Clocks are unique advertising media as well as being practical timekeepers all in one. Install them on walls, desks or counters, wherever they can help promote your products and services.

Custom Clocks are a well-liked present for family, friends and business partners.

The brilliant full colour designs get printed on two top-quality materials: white foam boards or sophisticated and transparent acrylic glass.

All Custom Clocks come with a quartz movement, metal hands in different colours and a battery.

- Ready-to-use, preassembled movement, including battery
- Wall clocks also available in size XXL (60 cm)
- Alarm clock, including precise quartz movement with alarm function

## Sledges

Sledges – a way of winter advertising full of fun!

Sledges decorated with customised graphics guarantee attention in any ski run, at ski hotels or in shop windows.

The designs are printed on a weather-proof seat cover made of sturdy PVC or economically mesh. It is spanned over the seat and stapled to the bottom side. Sledges prove their worth with maximum stability. All single parts of the rack and the front runners are made as a continuous unbroken piece.

Capable of accommodating up to 90kg in weight, each rack is made of durable and glued laminated wood combined with powder-coated metal fittings to guarantee sledges with a lot of fun while on the move.

- Davos- or Horn sledge with customised printable seat covers
- Exceptional stability thanks to rack made of glued laminated beech wood
- TÜV-inspected (GS label), FSC® certified for sustainable forestry
- Printable in portrait and landscape format
- Various pull cords available as accessories

## Goal Walls

Ensure your advertising scores! Football goals with custom-designed target walls turn almost any area into a playing field.

During popular goal-scoring contests, they also represent a reliable way to promote brands, products and services. The freestanding and stable metal construction keeps this goal frame stable on all level surfaces. The weather-resistant target wall is easily attached to the powder-coated steel tubes. Meanwhile, the full-surface printed target walls made of durable polyester or robust mesh can be quickly and easily attached to the frame using hook-and-loop tape.

Ready for kick-off? Large and reinforced target holes (Ø 40 cm) ensure unending fun for players.

- Goal Wall with customised printed target wall
- Textile version: target holes reinforced with coloured binding
- Freestanding, stable metal frame construction made of powder-coated metal tubes
- Simple construction through click-in installation with safety lock

## Windbreaks

Treat yourself to some relaxation and protect yourself against wind, weather and unwanted glances.

Windbreaks are an eye-catcher wherever installed, on the beach, campsite or in the garden. Printed with customised graphics, they can be flexibly configured to meet your needs.

Balcony Windbreaks are balcony and visual decoration all in one. The textile coverings are printed with your designs and then quickly and easily attached with cable ties to hooks, poles or rails.

You may like to consider a perfect combination of windbreaks, folding chairs and parasols all with a matching design.

- Robust and quick-drying material
- Hydrophobic finishing can be applied on request
- For portable Windbreaks: pointed wooden rods included in delivery

## Gate Cover

Gate Covers allow you double the opportunity to use security systems in foyers or checkout areas!

As well as facilitating anti-theft protection, these units also represent exceptionally effective advertising and information spaces. Gate Covers made of fabric can withstand mechanical stresses such as wear and tear or other impact. In foyers with considerable human traffic, this helps ensure durability and effective advertising for an extended period, particularly compared to conventional equivalents made of paper and plastic. The size of the cover can be adapted to your existing security systems.

The fabrics used are flame-retardant, which makes them ideal for interior use.

- Additional advertising space within view of the customer
- Robust and optimising the ad impact
- Ease of handling: simply pull the Gate Cover over the security system
- Available in various fabrics

### Drapes

Just hang in there!  
Drapes printed with logos, slogans or customised graphics give you a particularly generous advertising space to work with. They can accommodate versatile applications, e.g. drapes for changing rooms, partitioning areas, as curtains or simply as a piece of decoration. The graphics are printed on one side of the opaque, crease-

resistant fabric Multisol® D 240 SE. They can be equipped with drapery hooks, large metal eyelets or loops. Drapes can be deployed flexibly, whatever the surroundings.

- Available in standard and custom sizes
- Various configurations: with loops, metal eyelets or drapery hooks
- Immediately ready for use, no pre-washing required

Drape with loops

### Wallpapers

Custom wallpapers transform the look of any room. Printed with logos, slogans or images, they offer striking promotion for brands or services in office and sales spaces, cafés, bars or restaurants - or even at home. Wallpapers add unequalled flair to residential or bedroom surroundings. The graphics are printed on superb and durable non-woven wallpaper. The individual sections are tailored and numbered on a bespoke basis. Benefit from an attachment to

your wall which is more than easy. The wallpaper is available in various surface qualities. All the different structures come with a flame-retardant finish.

- Non-woven wallpaper in various options: plain or embossed cork-like, leather-like or stripes
- PVC-free, without softener, printed with environmentally friendly inks
- Trimmed delivery of wallpaper
- Easy to install, hanging the wallpapers requires pasting

# We print carbon neutral

## Carbon neutral printing

### Time to protect our climate!

As one of the pioneering textile printing businesses nationwide, we offer our customers a carbon neutral printing option, for both screen- and digital printing.

The process of CO<sub>2</sub>-compensated printing helps you make a voluntary contribution to help protect our climate.

Carbon neutral printing stands for sustainable commitment to climate protection.

We appreciate responsibility shown towards our environment and reflect a passion for innovation and progress.

Our production technologies are economically configured to work in harmony and are subject to continual improvement.

We ensure all media are used effectively through regular media consumption analyses.

Constantly monitoring the technological parameters in the production process ensures that gas, water, electricity and chemicals are all used in a resource-saving manner and helps minimise the quantity of waste generated.

We operate in accordance with the principles of effective environmental protection and configure the details of our work in line with the guidelines for the environmental management systems EMAS II and DIN EN ISO 14001.

### What is carbon neutral printing?

Carbon neutral printing means any CO<sub>2</sub> emissions generated during the production of your print jobs are determined and converted to a monetary amount. This amount is then invested in climate protection certificates in globally recognised climate protection projects.

Our textile products are inspected in accordance with the Oeko-Tex® Standard 100 and bear the label "Confidence in textiles". For you, this label is the ultimate confirmation that our textile products do not harm the environment.

The UV inks used in the digital printing process are VOC-free and certified in accordance with the Nordic Eco label (Nordic Swan). During the production process we use environmentally friendly water-based dispersion and pigment dyes as well as sublimation dyes.

### Three steps to a climate-neutral print job

#### 1. Determine CO<sub>2</sub> emissions

Working with the Federal Association of Printing and Media, we calculate the CO<sub>2</sub> emission generated for each product during the printing.

- A practical example:  
Flags in landscape format  
· Material: Multiflag®  
· Size: 250 x 150 cm  
· Printed in four colour process, standard finish

Quantity	Printing method	CO <sub>2</sub> emissions	Compensation costs
3 pcs.	Digital printing	45 kg CO <sub>2</sub>	ca. 0.78 EUR
100 pcs.	Screen printing	1,100 kg CO <sub>2</sub>	ca. 18.54 EUR

For a print job to be carbon neutral, the compensations costs average out at less than 1% of the order value.

#### 2. Compensate emissions: Climate protection projects

We have enlisted an experienced and reliable contract partner in the field of climate protection. The company is among the leading CO<sub>2</sub> asset management companies in Europe and is globally active in the market for emission certificates.

Global projects on the following environmental themes are financed:

- Renewable energie sources
- Increased energy efficiency
- Reduction of methane
- Reforestation
- Building up local facilities and utilities

#### 3. Mark a print job as „carbon neutral“:

At your request, we can label your prints as „Print CO<sub>2</sub> compensated“. This logo is an effective and prominent way of conveying your responsibility and commitment towards protecting the climate and the environment.

In addition, a certificate number is assigned to your print job. This unique number then lets you retrieve details about the commitment made and projects supported online.

Partner for calculating CO<sub>2</sub> emissions

## The online shop of Sachsen Fahren

Order around the clock, even overnight, at Vispronet® – the online shop of Sachsen Fahren. See all the advantages:

### Exceptional product diversity

Order from a range of more than 1,000 products encompassing millions of potential configurations. There is even more scope to experiment thanks to the free-sizing option.

### Immediate and on-site consulting

The Vispronet® service team will advise you on products and services over the phone or via online chat. Our experienced sales representatives will be happy to visit to you and advise you on site.

### Custom sizes

Select between standard or custom sizes! Almost all products can be produced in custom sizes. Giving you even more free scope in which to try out your ideas.

### Digital printing or screen printing

Whatever your chosen application, Vispronet® will propose the most cost-effective printing method. Digital printing or screen printing – you decide.

### For resellers and municipalities

Registered resellers can obtain a special discount of 3% and purchase on account. Do not hesitate to ask for further services.

### Free check of your print files

For all orders, Vispronet® performs a comprehensive, free-of-charge data check against specific criteria. If errors occur you will be immediately informed by e-mail. In addition, you can also reserve a chargeable „Data Check Professional“.

### Discounts

Capitalise on appealing price advantages! Many products allow you to enjoy a bulk discount when ordering larger quantities. Additional benefits are available to registered resellers on request.

### Shopping basket without limits

You can place an unlimited number of order items into your shopping basket. This makes it even quicker and more efficient for you to order a range of different products.

### Standard, express- or overnight delivery

Depending on the product, selected printing process and quantity, you can also select between a range of delivery times. Express and overnight delivery options are also available for almost all products.

### Shipping with many services

Vispronet® delivers Europe-wide. At your choice, goods can be sent to another shipping address, in partial deliveries to different shipping addresses or as carbon neutral shipping, as well as with your sender address and delivery slip.

## Three steps to your finished product

In just a few steps, with no previous graphic design knowledge needed, you can use the Visprodesign® tool to create your own customised designs. When using this tool, you have access to **numerous complimentary design templates, clip arts and images**, which you can also combine with your own choice of photos, texts or images.

**Step 1**  
Select your product, configure it and then proceed to „Design your product“.

**Step 2**  
Design your product using the free design templates and clip arts provided, which you can also combine with your own choice of photos, texts or images.

**Step 3**  
Complete the order by placing your product in the shopping basket and proceeding to check-out.
